

DOCUMENT CAMERA
P100N
INSTRUCTION MANUAL

Please read this instruction manual carefully before using this product and keep it for future reference.

IMPORTANT SAFEGUARDS

■ **Read Instructions** – All the safety and operating instructions should be read before the appliance is operated.

■ **Retain Instructions** – The safety and operating instructions should be retained for future reference.

■ **Heed Warnings** – All warnings on the product and in the operating instructions should be adhered to.

■ **Follow Instructions** – All operating and use instructions should be followed.

■ **Cleaning** – Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.

■ **Attachments** – Do not use attachments not recommended by the product manufacturer as they may cause hazards.

■ **Water and Moisture** – Do not use this product near water - for example, near a bath tub, wash bowl, kitchen sink, or laundry tub, in a wet basement, or near a swimming pool, and the like.

■ **Placement** – Do not place this product on an unstable cart, stand, tripod, bracket, or table. The product may fall, causing serious injury to a child or adult, and serious damage to the product. Use only with a cart, stand, tripod, bracket, or table recommended by the manufacturer, or sold with the product. Any mounting of the product should follow the manufacturer's instructions, and should use a mounting accessory recommended by the manufacturer.

■ **Ventilation** – Slots and openings in the cabinet are provided for ventilation and to ensure reliable operation of the product and to protect it from overheating, and these openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug, or other similar surface. This product should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided or the manufacturer's instructions have been adhered to.

■ **Power Sources** – This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home consult your appliance dealer or local power company. For products intended to operate from battery power, or other sources, refer to the operating instructions.

■ **Grounding or Polarization** – This product may be equipped with either a polarized 2-wire AC line plug (a plug having one blade wider than the other) or a 3-wire grounding type plug, a plug having a third (grounding) pin. The 2-wire polarized plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug still fails to fit, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the polarized plug. The 3-wire grounding type plug will fit into a grounding type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the grounding type plug.

■ **Power-Cord Protection** – Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the product.

■ **Lightning** – For added protection for this product during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the product due to lightning and power-line surges.

■ **Overloading** – Do not overload wall outlets, extension cords, or integral convenience receptacles as this can result in a risk of fire or electric shock.

■ A product and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the product and cart combination to overturn.

■ **Object and Liquid Entry** – Never push objects of any kind into this product through openings as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock. Never spill liquid of any kind on the product.

■ **Servicing** – Do not attempt to service this product yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

■ **Damage Requiring Service –** Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:

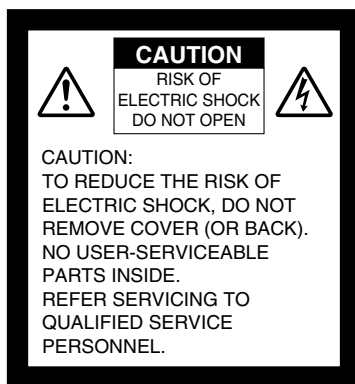

- When the power-supply cord or plug is damaged.
- If liquid has been spilled, or objects have fallen into the product.
- If the product has been exposed to rain or water.
- If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to its normal operation.
- If the product has been dropped or damaged in any way.
- When the product exhibits a distinct change in performance - this indicates a need for service.

■ **Replacement Parts –** When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock or other hazards.

■ **Safety Check –** Upon completion of any service or repairs to this product, ask the service technician to perform safety checks to determine that the product is in proper operating condition.

■ **Heat –** The product should be situated away from heat sources such as radiators, heat registers, stoves, or other products (including amplifiers) that produce heat.

■ This product includes a Fluorescent Lamps component that contains mercury. Please consult your state and local regarding proper disposal or recycling, and do not place in the trash.

SA 1965

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons. This marking is located at the bottom of product.

SA 1966

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.

WARNING:
TO REDUCE THE RISK
OF FIRE OR ELECTRIC
SHOCK, DO NOT
EXPOSE THIS
PRODUCT TO RAIN OR
MOISTURE.

THIS IS A CLASS A
PRODUCT.
IN A DOMESTIC
ENVIRONMENT THIS
PRODUCT MAY CAUSE
RADIO
INTERFERENCE IN
WHICH CASE THE
USER MAY BE
REQUIRED TO TAKE
ADEQUATE MEASURES.

WARNING : Handling the
 cord on this product or
 cords associated with
 accessories sold with this
 product, will expose you to
 lead, a chemical known to
 the State of California to
 cause birth defects or
 other reproductive harm.

***Wash hands after
 handling.***

**FOR UNITED STATES
 USERS:**

INFORMATION

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

**USER-INSTALLER
 CAUTION:**

Your authority to operate this FCC verified equipment could be voided if you make changes or modifications not expressly approved by the party responsible for compliance to Part 15 of the FCC rules.

BEFORE YOU USE

- Be sure to use the power cord and AC adapter attached to this camera system as accessories.
- The power cord applicable to the local power specifications is attached. Be sure to use the power cord applicable to your local power specification.
- Do not leave this product under direct sunlight or by heaters, or this product may be discolored, deformed, or damaged.
- Do not place this product in any humid, dusty, windy or vibrating location. Use this product in the following environmental conditions:
 - Temperature: 5°C~40°C (41°F~104°F)
 - Humidity: 30%~85% (No condensation)
- In handling (including setting up and storing) or carrying the camera, be meticulously careful not to give an impact on the camera head.
- To prevent dropping and falling, observe the following:
 - Use the camera on a stable stand, desk or table. Never put the camera on any shaky stand or inclined or instable place.
 - Before using, lay out the power cord, the AC adapter cable and the video cable not to be pulled, and wire them accordingly.
- Use a soft, dry cloth for cleaning. Do not use any volatile solvent, such as thinner or benzene.
- Do not directly point the camera lens into the sun, or the camera may be damaged.
- Caring for the batteries:
 - If this camera system is not used for a long time, take out the batteries from the wireless remote control.
 - Do not use rechargeable batteries (e.g., Ni-Cd)
 - Do not use new and old batteries, or batteries of different types together.
 - Do not try to recharge or short-circuit the batteries.
 - When disposing of used batteries, follow the instructions from each local government.
- Luminescent and Black Spots

This camera has a CMOS area image sensor and a color LC panel, which are composed of many pixels. Some of these pixels may not operate normally. As a result, a luminescent spot or a black spot may appear on the output screen. However, this is a phenomenon unique to the CMOS area image sensor and color LC panel and therefore this phenomenon is not faulty.
- Do not press the LC panel strongly or with a sharp-pointed object, or it would cause break or failure to the color LC panel.
- Transfer the data in an SD card to a PC or other data storage means for backup purpose. Note with care that the data in the SD card could be lost due to failure or repair of this product.
- Network function

This function does not guarantee the normal operation when this camera system is connected directly to the Internet. Shut down any communication not routed via packet filter or the like in a router or the like.
- Microphone

If a microphone other than that for PCs (electret condenser microphone) is connected to this camera system, this camera system could be broken down.

Functions

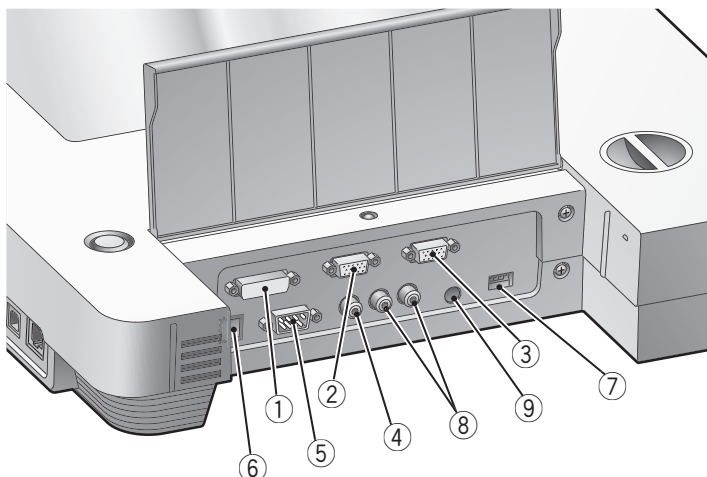

■ Front Operating Panel

* Hereinafter the menu items to be displayed/selected on the monitor or projection screen are referred to as "OSD (On-Screen Display)".

| Name | | Function |
|------|-------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| ① | LCD panel | To display the output image and the OSD |
| ② |  LAMP | To switch the illumination P.104 |
| ③ | TEXT (Text mode) | To switch the mode to Text1 To make B&W images of letters or lines sharp in contrast Use this button to display materials such as documents |
| ④ | GRAPHICS (Color document) | To switch the mode to Graphics To display color objects such as figures and photos |
| ⑤ | BRIGHTNESS (Brightness) | <div> (Dark)</div> <div> (Light)</div> To darken the camera image P.110 |
| ⑥ | | To lighten the camera image P.110 |
| ⑦ |  CAMERA | To switch the output image to the camera image P.106 |
| ⑧ |  PC (RGB IN video) | To switch the output image to the RGB IN image P.106 |
| ⑨ |  SD (SD mode) | To switch the output image mode to the SD mode P.106 |
| ⑩ | AF (Auto Focus) | To focus the camera automatically P.108 |
| ⑪ | ZOOM | To operate the zoom function by turning the dial P.105 |

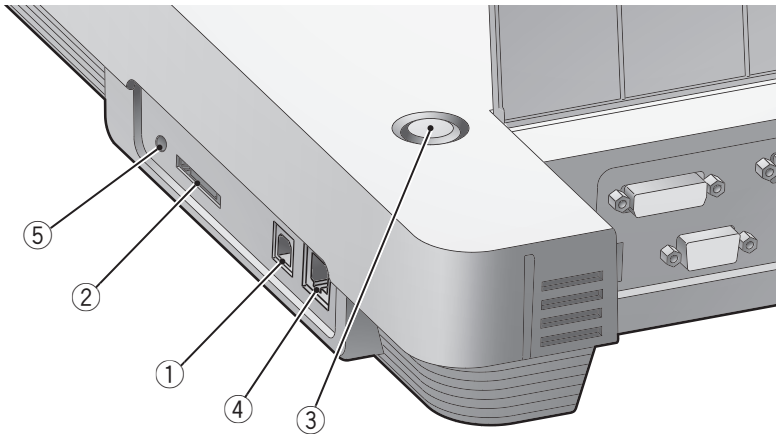

■ Rear Panel

| | Name | Function | Image whose display is selectable with image select button | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
|------------|------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------|----------|---------|---------|------|---|---|-----|---|---|------|---|---|--------|---|---|----------|---------|------|---|-----|---|----------|---------|-----------|---|------------|---|--|
| ① | DVI OUT (DVI Output Terminal) | To output digital video signal to the projector, the PC monitor or other DVI input device P.91 | <div><div>Camera image</div><div>SD mode</div></div> | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| ② | RGB OUT (Analog RGB Output Terminal) | To output analog video signal to the projector, the PC monitor or other RGB input device P.91 | <div><div>Camera image</div><div>[RGB IN] image</div><div>SD mode</div></div> | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

| PAL | 1 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Settings | [D] key | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Over scan | 0 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Under scan | 1 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| ⑧ | AUDIO OUT (Audio Output Terminal) | To output the microphone input and the audio input in the mixed status P.102 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| ⑨ | AUDIO IN (Audio Input Terminal) | To output the input audio as it is from the AUDIO OUT terminal P.102 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

* [Video Out] → [Camera & SD] on the OSD skips [RGB IN] image.

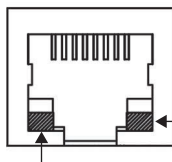

■ Side Panel

| | Name | Function |
|---|-----------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| ① |  (USB terminal, compliant with 2.0) | To enable the image transfer or the main unit control by using the utility software on the supplied CD-ROM when the camera is connected to the PC P.91 |
| ② |  (SD Card Slot) | To insert an SD card To remove the SD card, push it in once P.96 |
| ③ |  Main Switch | To turn ON/OFF the power supply |
| ④ |  (Ethernet terminal, 100BASE/10BASE) | To enable the image transfer or the main unit control when the camera is connected to the network P.101,102 |
| ⑤ | MIC (Microphone input terminal) | To enable the audio output from the AUDIO OUTPUT terminal when the PC microphone (electret condenser microphone) is connected to the PC. The audio volume is adjustable P.101,102 |

Explanation of the Ethernet terminal LED

Yellow ... ON: Link OK, Blinking: Access

Green ... ON: 100BASE, OFF: 10BASE

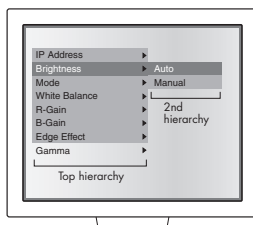

OSD (On-Screen Display)

The menu items displayed/selected on the monitor or the projection screen are referred to as "OSD (On-Screen Display)".

When the **[MENU]** button on the wireless remote control is pressed, the OSD menu appears on the monitor screen. (When this **[MENU]** button is pressed again, the OSD menu disappears.)

Move to the item to be set by pressing the **[▲ ▼ ◀ ▶]** direction buttons on the wireless remote control, and press the **[ENTER]** button to fix the setting. When the **[◀]** direction button is pressed, the OSD menu hierarchy is traced back. When the same button is pressed on the first hierarchy, the OSD menu disappears.

Sample image of the top and 2nd hierarchies

■ Camera Mode (Menu when camera image is in display)

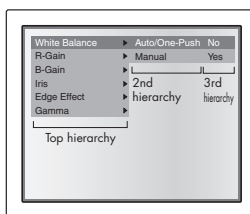

| Name | | | Function |
|--------------------|-------------------------------|---------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Top hierarchy | 2nd hierarchy | 3rd hierarchy | |
| IP Address | Display | | To display the IP address |
| Brightness | Auto | ✓ | To vary the degree of brightness automatically according to the object P.100 |
| | Manual | | To fix the image brightness to any level P.100 |
| Mode | Text3 | | Text1, Text2 and Text3 are used to display B&W characters and documents sharply. The larger the number affixed to Text is, the larger the effect is. Graphics is used to display color figures and photographs cleanly. Only when Graphics is selected, Edge Effect and Gamma can be set. |
| | Text2 | | |
| | Text1 | ✓ | |
| | Graphics | | |
| White Balance | Auto | ✓ | To set the white balance to automatic following |
| | One-Push | | To set the white balance to fix |
| | Manual | | To adjust the red intensity and the blue intensity manually |
| R-Gain | (Displayed in level bar form) | | To adjust the red intensity when the white balance is set to manual |
| B-Gain | (Displayed in level bar form) | | To adjust the blue intensity when the white balance is set to manual |
| Edge Effect | 3 | | This can be set only when the mode is set to Graphics. Edge enhancement is provided to the image to make it sharp. The larger this number is, the larger the effect is |
| | 2 | | |
| | 1 | ✓ | |
| | Off | | |
| Gamma | High | | To set the gamma curve when the mode is set to Graphics. The grayscale can be varied as you like. |
| | Normal | | |
| | Low | ✓ | |
| USB Mode /Ethernet | Mass Storage (Transfer) | Yes or No | Mode to be set to transfer the data from the SD card into the USB-connected PC P.100 |
| | Application | ✓ Yes or No | Mode to be set to control the main unit from the USB-connected PC or transfer the image into the USB-connected PC P.99 |
| | Ethernet | Yes or No | Mode to be set to control the main unit from the Ethernet-connected PC or transfer the image into the Ethernet-connected PC P.101/102 |

Setting change becomes effective when the power switch is turned OFF and then turned ON.

| Name | | | Function |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|---------------|--------------------------------------------------------------------------------------------------------------------------------|
| Top hierarchy | 2nd hierarchy | 3rd hierarchy | |
| Capture | SD ✓ | | Mode to write the image on the SD card set on the main unit side when the [C] button on the wireless remote control is pressed |
| | Ethernet | | Mode to save the image file in the FTP server when USB Mode/Ethernet is set to Ethernet |
| Guide | On ✓ | | To set whether the operation status of the main unit should be displayed. |
| | Off | | |
| Video Out | All Mode ✓ | | To output the [VIDEO OUT] terminal signal according to all video switching |
| | Camera & SD (Image of Camera & SD only) | | To limit the switching of the [VIDEO OUT] terminal output to the camera video and the SD mode |
| Flickerless (Flicker compensation) | 60Hz ✓ | | To reducer fluorescent lamp flicker due to power supply frequency |
| | 50Hz | | |
| Ethernet Status  Setting change becomes effective when the power switch is turned OFF and then turned ON. | Default | | To reset the Ethernet Status to the factory settings |
| Call (Setting Call) | Default | | To reset the Call to the factory settings (not applicable to USB Mode/Ethernet, Flickerless/WEB Ethernet settings) |
| Mic Volume | (Displayed in the level-bar form) | | To adjust the audio level of the microphone input |

* [✓] indicates the factory default settings. The factory default settings of Flickerless vary according to the destination. The settings of USB Mode and Flickerless retain the last set state.

Sample image of the 1st, 2nd and 3rd hierarchies

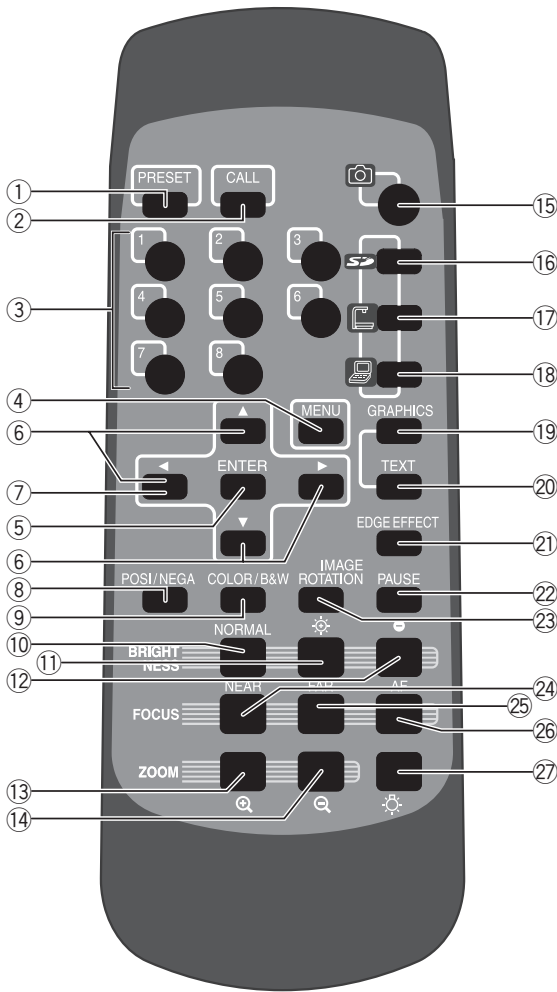

■ SD Mode (Menu when image stored in an SD card is in display)

| Name | | | Function |
|-----------------------------------------------------------------------------------------------------|-----------------------------|---------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Top hierarchy | 2nd hierarchy | 3rd hierarchy | |
| Delete  | Current (Selected Image) | No | To cancel the delete |
| | | Yes | To delete the image in display on the full screen or the image selected from the split screen. Locked image can not be deleted. |
| | All (All images) | No | To cancel the delete |
| | | Yes | To delete all images |
| Lock | Current (Selected image) | | To lock the image in display on the full screen or the image selected from the split screen. Can set the image not to be deleted or select image for slide-show. On the split screen, a green frame appears on the locked image. |
| | All (All Images) | | To lock all image files. Can select the delete-protected image or the image to be displayed on the slide show |
| Unlock (Lock Release) | Current (Selected Image) | | To release the lock of the image in display on the full screen or the image selected from the split screen |
| | All (All Images) | | To release the lock of all image files |
| Format Media  | Format (Initialize) | No | To cancel the format |
| | | Yes | To format the SD card  All data will be deleted from the card. |

| Name | | | Function |
|-------------------------------------------------------------------------------------------------------|--------------------------------------|---------------|-----------------------------------------------------------------------------------------------------------|
| Top hierarchy | 2nd hierarchy | 3rd hierarchy | |
| Slide Show Settings  | Interval (Interval of Image Feed) | 3 Sec ✓ | To set the interval of slide show until displaying the next image from 3 to 30 sec |
| | | 5 Sec | |
| | | 10 Sec | |
| | | 15 Sec | |
| | | 30 Sec | |
| | Effect (Effect of Image Feed) | Left to right | To slide from left to right |
| | | LT to RB | To slide diagonally from left top to right bottom |
| | | RT to LB | To slide diagonally from right top to left bottom |
| | | None ✓ | To show no visual effect |

■ Receivable Range

Point the infrared emitting part of the wireless remote control at the infrared sensor of the main unit, and press the button for desired function.

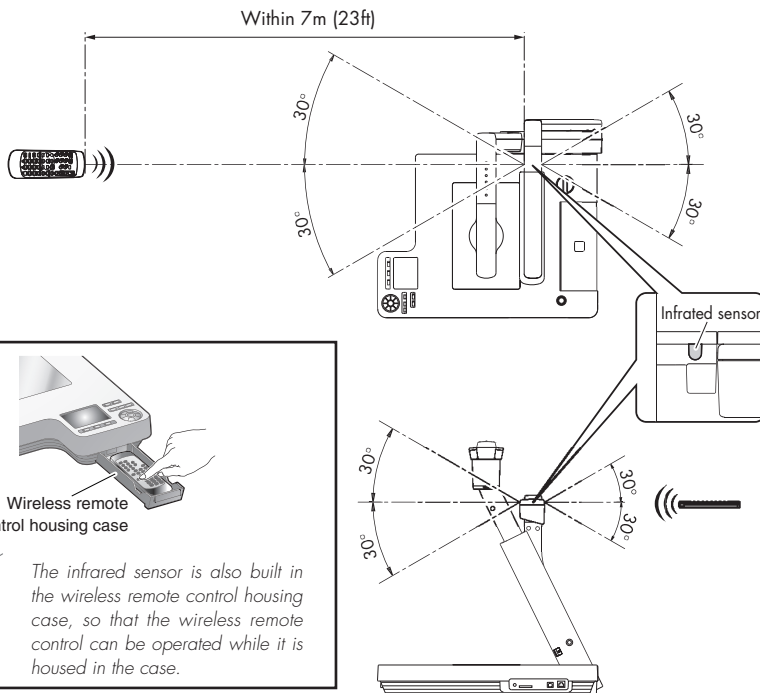

The receiving range may be reduced when the main unit is placed in direct sunlight, near an inverter fluorescent lamp or in any other unfavorable surroundings.

Depending on the conditions of fluorescent lamps, etc., the sensor may fail to receive the infrared light. In such case, relocate the main unit, or take other countermeasures.

• Receivable range

Distance: Approx. 7m (23ft) or less from the front of the infrared sensor

Angle: Approx. 30° or less to the rightward, leftward, upward and downward, respectively, from the infrared sensor

■ Battery Change

Remove the battery case cover on the rear side by pressing down the [↓ OPEN] mark part in the direction as indicated by the arrow.

Install 2 batteries (Type R03, AAA) in the battery case in the direction as indicated.

Install the batteries with the correct polarity.

Although the battery life depends on the operating conditions and battery type, the batteries are recommended to be changed once a year.

The supplied batteries are only for use in initially confirming the operation of this product. Therefore, it is not guaranteed that these batteries remain alive for the validated period.

WEB Screen

When connection is made to <http://192.168.0.100> on the browser, its top page opens. By clicking each item there, the clicked item can be operated. P.101

"192.168.0.100" is default. Input the IP address used in the network configuration of SET UP.

■ Top page

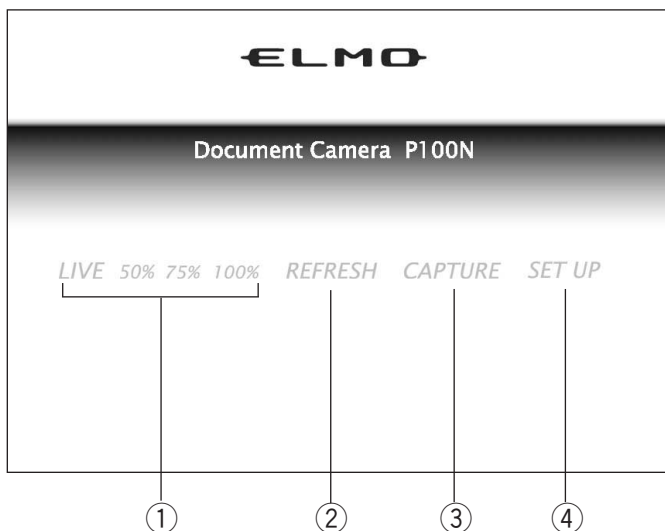

It is necessary to set USB Mode/Ethernet to Ethernet on the OSD, and use it in the camera mode.

If the resolution settings are changed with the DIP switch or the USB Mode/Ethernet settings are changed, restart the browser.

If USB Mode/Ethernet has been set to Mass Storage or Application on the OSD, SET UP alone will become effective.

■ Network Configuration

The screenshot shows a 'Network Setting' window. It contains five rows of settings: 'IP address' (192.168.0.100), 'Subnet mask' (255.255.255.0), 'Default gateway' (0.0.0.0), 'Root Password' (with a 'Change' checkbox), and 'User Password' (with a 'Change' checkbox). Below these are 'Setup' and 'Clear' buttons. At the bottom is a 'Configurations' link. Numbered callouts point to each of these elements: 1 (IP address), 2 (Subnet mask), 3 (Default gateway), 4 (Root Password), 5 (User Password), 6 (Change checkboxes), 7 (Setup button), 8 (Clear button), and 9 (Configurations link).

| Name | Function (< >: Factory settings) |
|-----------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| ① IP address | IP address information set in this camera system <192.168.0.100> |
| ② Subnet mask | <255.255.255.0> |
| ③ Default gateway | Router IP address <0.0.0.0> |
| ④ Root password | Password for setting the network, using the FTP server function, setting of the FTP client and using the telnet. Up to 127 alphanumeric characters |
| ⑤ User password | Password for setting the FTP client to enable the use of the [image transfer] button and using the FTP server function. Up to 127 alphanumeric characters <Setting Information> |
| ⑥ <input type="checkbox"/> Change | To set or change the password, this check box should be checked. If this check box is checked but nothing is entered in the password edit box, the relevant password information will be cleared. |
| ⑦ Setup | To set to the contents in display |
| ⑧ Clear | To reset all edit contents to the state as of opening of this page |
| ⑨ Configurations | To display the configurations page |

Network configuration change becomes effective when the power switch is turned OFF and then turned ON.

2 SETTING UP

Setting Up

- (1) Release the camera column lock by turning the security lock knob.

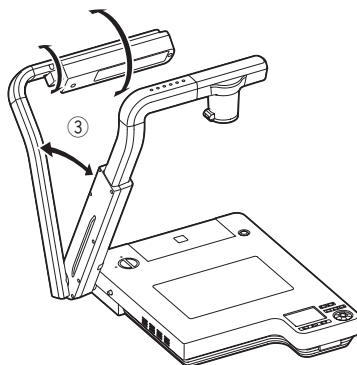

- (2) As shown in the right figure, hold the setup grip and raise the camera column. At this time, the camera head slides up in conjunction with the rise of the camera column. The lamp column also rises together.

- (3) If necessary, move the lamp column and the lamp head to an appropriate position as shown in the right figure.

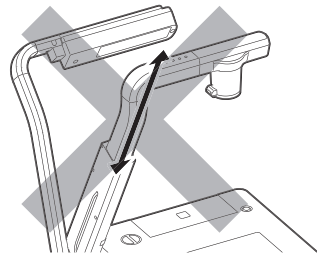

When using a glossy paper, the document could reflect the illumination to disable normal display. In this case, adjust the lamp position to a position in which such reflection can be avoided.

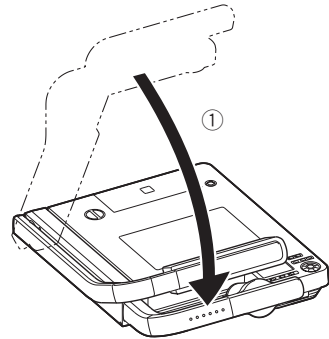

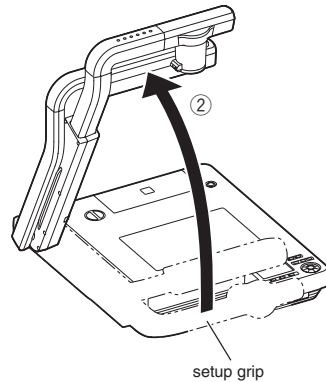

If the camera column is pulled or pushed forcibly, the camera might be pushed out of position by a function not to break mechanical parts, and the camera image might be displaced from the display center. In this case, initialize the camera position as follows:

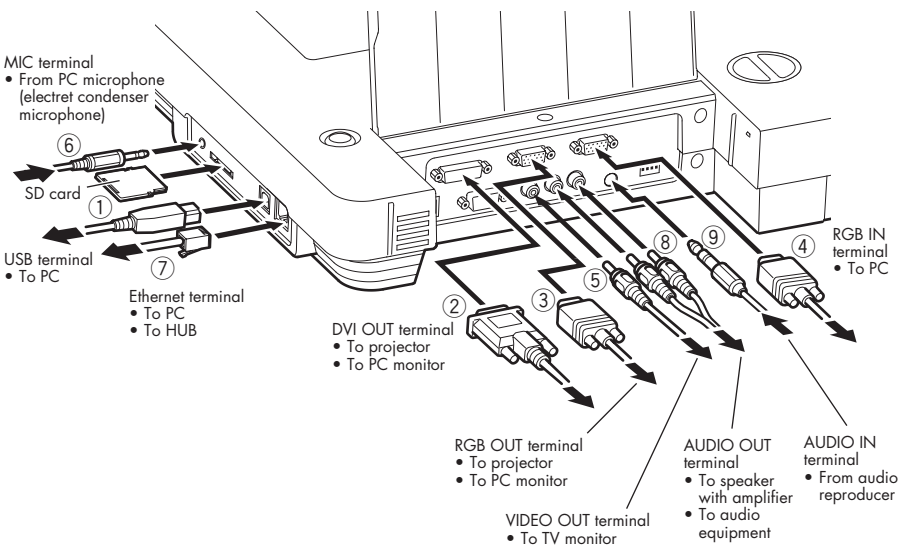

- (1) Fold the camera column on the stage. When the camera column is folded in the storage position, the camera position is initialized.

- (2) Then, raise the camera column.

Connecting Cables

To protect this product and the peripheral units to be connected to this product, be sure to turn OFF the power supply to all units beforehand.

When plugging in/out the connection cable, hold the plug part of the cable.

For the information of image output switching, refer to P.75 [DIP Switch].

Load the SD card with the label facing up. Forcible insertion by mistake could cause failure.

This camera system does not accept the SDHC card. Use the recommended card only.

① Connecting to the PC with a USB cable

Connect the USB cable to the [] (USB) terminal on the side panel.

The USB cable compliant with USB2.0 is recommended.

If you plug into a USB cable with power on, PC may not recognize this product.

Depending on the USB environment used by the PC or the influence of peripheral units, the video transfer could be disturbed.

This does not guarantee the normal operation in any environment.

② Connecting to the unit having the DVI input terminal

Connect the DVI cable to the [DVI OUT] terminal on the rear panel.

③ Connecting to the unit having the analog RGB input terminal

Connect the analog RGB cable to the [RGB OUT] terminal on the rear panel.

The display position may be displaced from the center of the screen. In such case, adjust the horizontal and vertical positions manually from the connected device.

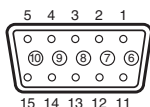

Vertical stripes may appear on the LCD projector screen or the monitor screen. This phenomenon can be mitigated by adjusting the dot clock manually from the connected device.

④ Connecting to the unit having the analog RGB output terminal

Connect the analog RGB cable to the [RGB IN] terminal on the rear panel.

- Specifications of the analog RGB input terminal of this product

Signal allocation

DSUB 15P shrink terminal (Female)

Video signal :

Analog 0.7V(p-p) 75Ω terminated

Horizontal synchronized signal : TTL level (Positive/negative polarity)

Vertical synchronized signal : TTL level (Positive/negative polarity)

Pin assignment

| Pin No. | Name | Pin No. | Name | Pin No. | Name |
|---------|----------------------|---------|-------------|---------|--------------------------------|
| 1 | Video signal (Red) | 6 | GND (Red) | 11 | GND |
| 2 | Video signal (Green) | 7 | GND (Green) | 12 | N.C |
| 3 | Video signal (Blue) | 8 | GND (Blue) | 13 | Horizontal synchronized signal |
| 4 | N.C | 9 | N.C | 14 | Vertical synchronized signal |
| 5 | GND | 10 | GND | 15 | N.C |

⑤ Connecting to the unit having the composite video input terminal

Connect the video cable with RCA pin plug to the [VIDEO OUT] terminal on the rear panel.

⑥ Connecting to the microphone

Connect the microphone for PCs (electret condenser microphone) equipped with 3.5mm mini plug cord to the [MIC] terminal on the side panel.

⑦ Connecting to the PC and the network with the Ethernet cable

Connect the Ethernet cable to the [] (Ethernet) terminal on the side panel.

⑧ Connecting to the speaker

Connect the speaker equipped with amplifier and RCA pin plug cord to the [AUDIO OUT] terminal on the rear panel.

⑨ Connecting to the audio reproducer

Connect the audio cable equipped with 3.5mm mini plug to the [AUDIO IN] terminal on the rear panel.

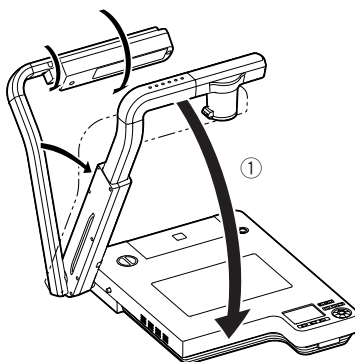

3 STORING

Storing

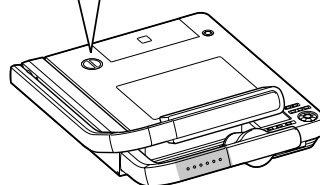

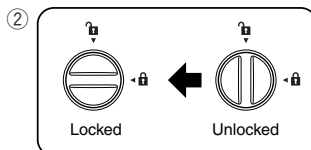

- (1) Return the lamp to the original position. Then, hold the setup grip of the camera column and fold the camera column. At this time, the camera head slides down and the lamp column also folds.

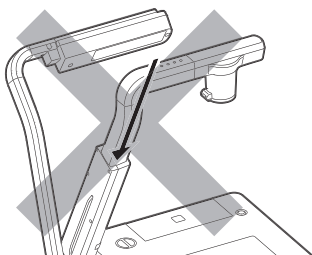

Turn OFF the power switch before the storing.

- (2) Lock the camera column and the lamp column by turning the security lock.

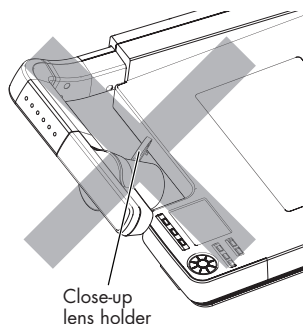

Do not force down the camera column and the lamp column when folding them.

When this camera system is not in use, unplug the power cord and the AC adapter from the plug socket.

Do not fold the camera column when the close-up lens holder remains open, or the close-up lens could be damaged.

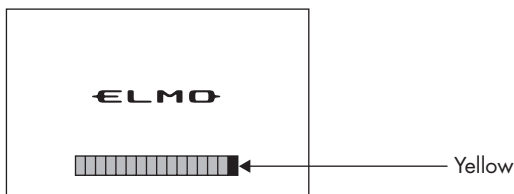

4 OPERATION PROCEDURE

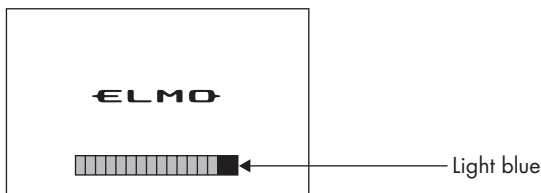

Turning ON/OFF the Power Supply

-  Be sure to use the main switch on the main unit to turn ON/OFF the power supply to the main unit.
-  Do not turn ON/OFF the power supply by plugging/unplugging the AC adapter or the power plug.
-  When connecting to other units, turn OFF the power supply to all connecting units.

It takes the main unit about 30 seconds to be ready for operation. During this time, the logo is on display.

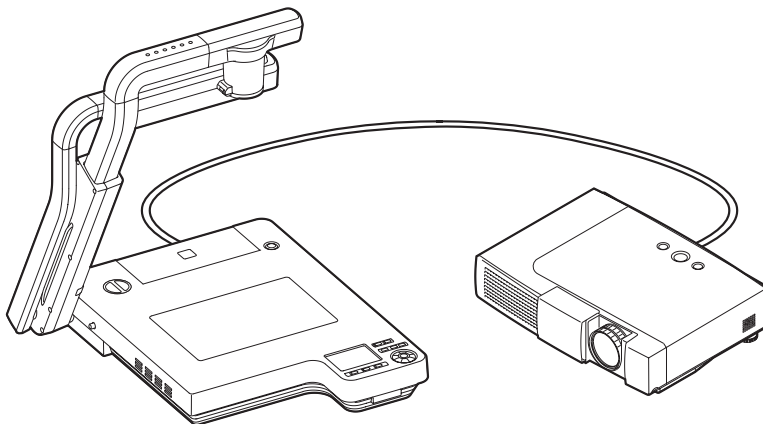

It takes the main unit about 10 seconds to be shut down completely. During this time, the logo is on display.

-  **Connection of the AC adapter**
Plug the DC plug of the attached AC adapter into the [12VDC IN] terminal on the rear panel, and then plug the AC adapter into the plug socket.

-  **About power failure**
Even if it is momentary, power failure would turn OFF the power supply to the main unit. In case of power failure, manually turn ON the power supply to the main unit after power recovery. If power failure is probable, it is advisable to install a UPS (uninterruptible power supply system).

Presentation by Using Documents, Films, etc.

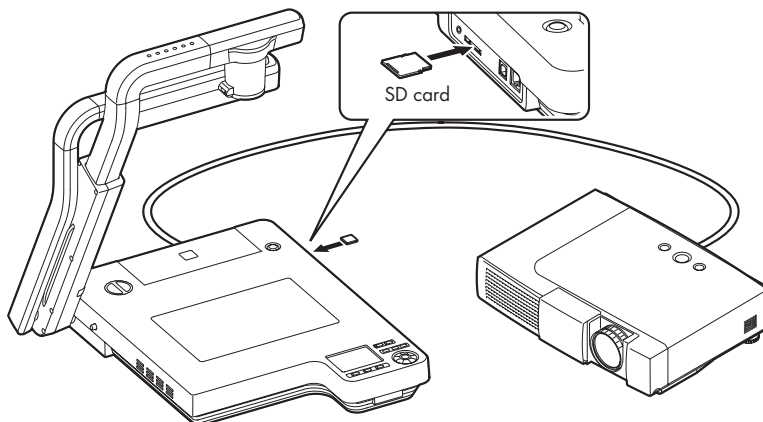

- ① **Setting the main unit**
Set the main unit as show in the above figure, connect the main unit to the projector or the PC monitor, and then turn ON the power supply.
- ② **Adjusting the size**
Place an object on the stage, and adjust the position of the object with the zoom dial **[ZOOM]** on the front operating panel or the zoom button ([**+**], [**-**]) on the wireless remote control so that the part of the object to be viewed can fit the screen size. **P.105**
- ③ **Adjusting the focus**
Press the **[AF]** button on the front operating panel or wireless remote control to focus the camera on the object. **P.108**
- ④ **Adjusting the brightness**
Press the **[BRIGHTNESS •]** button on the front operating panel or wireless remote control to adjust the brightness of the image by the lens iris. **P.110**
When the illumination is switched by pressing the [**LAMP**] button, the light distribution according to the material can be achieved. **P.104**

When the main unit is connected to the DLP projector and GRAPHICS is selected, both documents and photos may be projected sharply. If necessary according to the projected condition, select GRAPHICS.

P.77

Presentation using optional SD card (Option)

 Before starting the operation, insert an optional SD card [Option] into the SD card slot on the side panel. Push it again to remove the SD card.

 When loading/unloading the SD card or the power supply is turned off, be sure to select the camera image by pressing the **[E]** button on the front operation panel or wireless remote control and confirm that the output image has been turned to the camera image beforehand. Otherwise, the SD card contents could be broken or failure could be caused to this camera system.

 The SD card is composed of parts vulnerable to static electricity. Therefore, due to the impact of static electricity, the SD card could malfunction or its contents could be destroyed. When handling the SD card, take care to avoid static electricity.

 The image data viewable on this camera system is limited to the image data saved in this camera system and the image data converted on the dedicated conversion software attached to this camera system.

 If the data of the system that is not compatible with this product, a black or gray image will be displayed.

 If the camera conversion to the image on the SD card is tried without loading the SD card, the output screen will be blackened. ([NO CARD] will be displayed on the screen.)

 After using the SD card, do not leave it inside this product but be sure to remove it.

 As an SD card, Panasonic 256MB or 512MB is recommended.
The resolutions of the image to be stored are 1280 × 1024 (SXGA output), 1280 × 720 (HDTV output) and 1280 × 960 (XGA output).
This product can store images up to 2048 pcs.

 ELMO is not liable for any damage caused by the loss of the data in the SD card or passive damage.

 The dedicated conversion software attached to this camera system cannot be used in the SD mode. Also, do not switch the mode to the SD mode during when the dedicated conversion software is in use, or failure could be caused to this camera system.

Presentation using optional SD card (Option) (Continued)

■ Saving the Image

- (1) Press the [] button on the front operating panel or wireless remote control to switch the image mode to the Camera mode.
- (2) Press the [] button on the wireless remote control.
- (3) When the [] mark lights up on the screen, the image saving starts. When this mark goes out, the image saving is completed.

Set [Capture] to [SD] on the OSD

Be sure to try shooting and confirm the normal saving of the image beforehand. If the image should be unable to be saved normally due to some problem with this camera or the SD card, we are not liable to compensate for such failure.

The [] mark on the screen is displayed only when the [Guide] menu is set to ON.

When the SD card is write-protected, the image cannot be saved in the SD card.

When the capacity of the SD card becomes full and no more images can be saved, the [] mark does not light up. Then, delete unnecessary images or use a new SD card.

When the SD card is in the read/write mode, do not remove the SD card, or failure could occur with this product.

If the image saving is tried when the digital zoom is in operation, the digital zoom will be cancelled and the image will be saved at the magnification set as of the shipment.

The image file does not record the correct time and date.

■ Displaying the image

- (1) When the [] button on the operating panel or the wireless remote control is pressed to switch the mode to the SD mode, the images saved on the SD card are displayed on the split-screen. The number of divisions can be changed by changing the OSD [Display] setting, which is 3×3 by default.
- (2) Move the selection frame (cursor) of the recorded image to the desired image by using the direction buttons [] on the wireless remote control, and press the [ENTER] button on the wireless remote control to display the selected image on the full-screen.

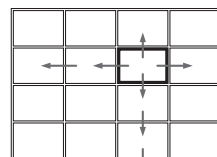

3 × 3

4 × 4

- When the images are displayed on the split screen (3×3, 4×4)

Move the selection frame (cursor) of the recorded image to the desired image by using the direction buttons [] on the wireless remote control, and press the [ENTER] button on the wireless remote control to display the selected image on the full-screen. When the direction button [] is held down, the selection frame (cursor) keeps downward movement as shown in the right figure.

(To the top of the next page)

- When the images are displayed on the full-screen
When the direction button [] or [] on the wireless remote control is pressed, the next image is displayed. When the direction button [] or [] is pressed, the previous image is displayed again.

The image displayed on the full-screen can be zoomed in/out by using the zoom dial on the front operating panel or the zoom button on the wireless remote control. When the image is zoomed in, the displayed part of the image can be scrolled by using the direction buttons [].

■ Deleting the Image

- (1) Press the [**SD**] button on the front operating panel or wireless remote control to display the images stored in the SD card in the full screen display mode or the divided screen display mode.
- (2) Select the image to be deleted by using the direction buttons [**▲ ▼ ◀ ▶**] on the wireless remote control.
- (3) Press the [**MENU**] button on the wireless remote control, and select the [Delete] menu of the OSD. To delete only the selected image, select [Current]. To delete all images, select [All].

When [Yes] is selected by pressing the [**ENTER**] button on the wireless remote control, the deletion is executed. (To cancel the deletion, select [No].)

■ Slide show

- (1) Press the [**SD**] button on the front operating panel or wireless remote control, and switch the output image mode to the SD mode.
- (2) Display the OSD by pressing the [**MENU**] button on the wireless remote control. When the [**START SLIDE SHOW**] menu is selected, the slide show starts.
- (3) When one of the direction buttons or the [**ENTER**] button on the wireless remote control is pressed, the slide show stops.
 - [Effect] (visual effect), [Interval] (display interval) and [Repeat] (repetition) can be set from the [Slide Show Settings] menu of the OSD.

■ Formatting the SD card

When the SD card is formatted, insert the SD card into this product, and execute formatting.

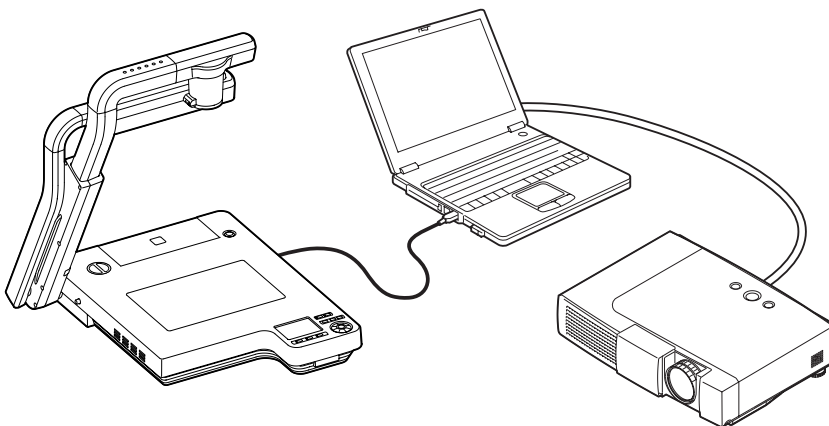

- (1) Press the [**SD**] button on the front operating panel or wireless remote control, and switch the output image mode to the SD mode.
- (2) Display the OSD by pressing the [**MENU**] button on the wireless remote control, and select [Format Media].
- (3) When [Yes] is selected by pressing the [**ENTER**] button on the wireless remote control, the deletion is executed. (To cancel the deletion, select [No].)

Now, [format] starts.

All data on the SD card is deleted.

Presentation using the supplied software with the USB-connected PC

Set [USB Mode/Ethernet] to [Application] on the OSD.

"Utility Software" is available from the supplied CD-ROM supplied from us.

"Utility Software" contains PC link software "Image Mate for Presentation" and TWAIN driver "ELMO TWAIN DS" (VHN) to allow the following operation:

- Transfer of moving/still images to the PC
- Operation of this product from the PC

A PC that Microsoft Windows2000 (SP4 or newer) or XP (SP2 or newer) has been installed is recommended.

For details, refer to the "Utility Software" Installation Manual and the help folder with the software.

When the power supply to this camera system is ON, do not connect/disconnect the USB cable, or malfunction will be caused to this camera system.

The USB cable compliant with USB2.0 is recommended.

When this camera is connected with the PC with a USB cable, the camera image frame rate lowers.

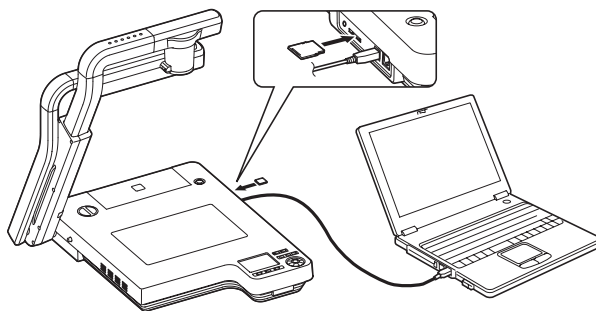

Depending on the USB environment used by the PC or the influence of peripheral units, the video transfer could be disturbed.

This does not guarantee the normal operation in any environment.

Transferring the images from the SD card into the USB-connected PC

Set [USB Mode/Ethernet] to [Mass Storage] on the OSD.

When this product is USB-connected to the PC, image data in the SD card can be transferred into the PC. The connectable PC is one that has been installed with Microsoft OS Windows2000 (SP4 or newer) / XP (SP2 or newer) / Vista.

- (1) Turn ON the power supply to this product and to the PC.
- (2) Connect this product to the PC with the supplied USB cable.

When this product is connected to the PC for the first time, the required drivers are installed automatically due to the plug-and-play function of Windows. For the second time and thereafter, the drivers are no longer installed.

- (3) This product is recognized as a removable disk. The image data in an SD card can be viewed by using the viewer software of the PC.

• The image data are stored in JPEG format in the following folders:

```

My Computer
├── Removable disk
│   ├── DCIM
│       └── 100_ELMO
│           ├── IMAG0001.JPG
│           └── IMAG0002.JPG
│           :
    
```

An SD card set in this product cannot be formatted or written, deleted, locked, and unlocked with image data from the PC.

The image data cannot be recorded with the correct date and time.

When the power supply to this camera system is ON, do not connect/disconnect the USB cable, or malfunction will be caused to this camera system.

Do not switch [USB Mode/Ethernet] when this camera system is in USB connection.

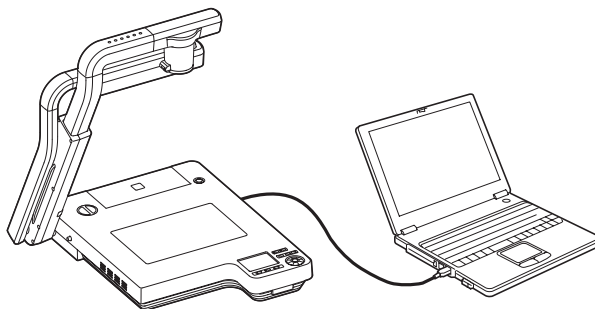

The USB cable compliant with USB2.0 is recommended.

When this camera is connected with the PC with a USB cable, the camera image frame rate lowers.

Depending on the USB environment used by the PC or the influence of peripheral units, the video transfer could be disturbed.

This does not guarantee the normal operation in any environment.

Displaying the Video Image through Network Connection

Set [USB Mode/Ethernet] to [Ethernet] on the OSD.

When connection is made to <http://192.168.0.100> on the browser, its top page opens. When [50%], [75%] or [100%] of [Live] is clicked, the video image is displayed. When [REFRESH] or [CAPTURE] is clicked, the still image is displayed.

To enable the access to this camera system on the web browser, the PC environment should be as follows:

- Windows2000 (SP4 or newer) / XP (SP2 or newer) / Vista has been installed.
- JRE (Java Runtime Environment) 1.5.0_12 or newer has been installed, and Java (Sun) is valid.
- Internet Explorer6 or 7 has been installed.

This camera system does not guarantee the normal access operation on all web browsers.

Depending on the version of the OS, the window size could not be set properly and/or the scroll bar could be displayed.

Depending on the settings of the Windows or virus check software, unfavorable phenomena, such as impossible connection to the camera and disturbed video image display, could occur. In this case, adjust the settings properly following the instruction manual of Windows or the virus check software.

This camera system uses the port of HTTP:80, FTP:20,21, telnet:23. When this camera system is connected to a router, firewall, etc., set the ports of these equipment accordingly.

In the SD mode or when the [PAUSE] button is pressed on the wireless remote control, neither the video image nor the still image can be displayed.

This camera system can be remote-controlled or the status of this camera system can be captured by using the telnet. For the information of its command, etc., contact the sales outlet from which you have purchased this camera system or the nearest branch office or sales office of ours.

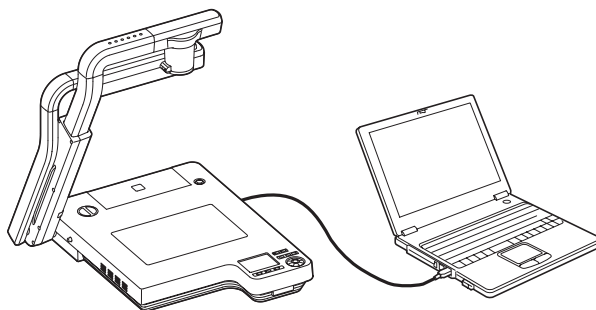

The browser address "<http://192.168.0.100>" is in default setting. Input the IP address to be used for the network configuration of [SET UP].

When the resolution settings are renewed with the DIP switch or the settings of [USB Mode/Ethernet] are changed on the OSD, restart the browser.

Capturing the Image through Network Connection with the FTP

 Set [USB Model/Ethernet] to [Ethernet] on the OSD.

 Set [Capture] to [Ethernet] on the OSD. (FTP client function)

The following 2 functions are available:

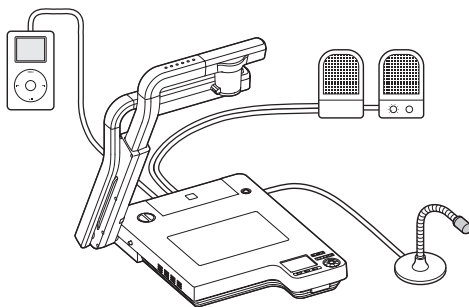

- FTP client function — Saving the image file in the FTP server by pressing the [] button on the wireless remote control
- FTP server function — Capturing the image to the PC through the FTP connection

 The time and date of the file displayed on the FTP server are not correct.

 This camera system does not guarantee all normal operations through the FTP connection.

 This camera system uses the port of HTTP:80, FTP:20,21, telnet:23. When this camera system is connected to a router, firewall, etc., set the ports of these equipment accordingly.

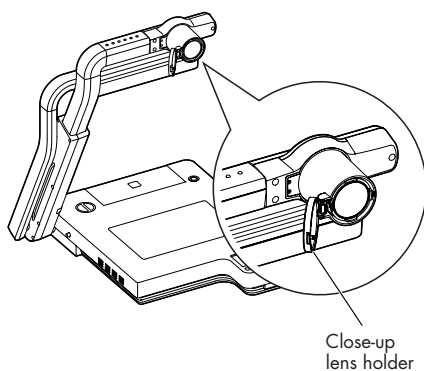

Using [MIC IN] and [AUDIO IN]

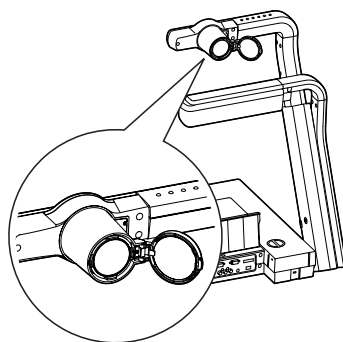

The microphone input and the audio input are mixed and output from [AUDIO OUT]. The microphone input level alone can be adjusted on the OSD.

 Only the microphone for PCs (electret condenser microphone) can be connected to [MIC IN]. If a microphone other than that for PCs is connected to [MIC IN], this camera system could be broken down. Before connection, carefully check the specifications of the microphone.

Shooting off the stage

<Forward shooting>

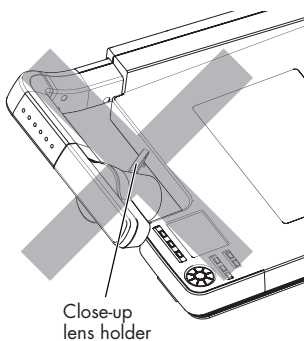

<Backward shooting>

When the camera head is set in the horizontal direction, walls, distant views, etc. can be shot. When the object is distant, open the close-up lens holder.

Do not fold the camera column when the close-up lens holder remains open, or the close-up lens could be damaged.

When the camera head is set horizontally for shooting ahead of this camera, the image can be rotated automatically by 180°.

Shooting area when the close-up lens holder is opened:

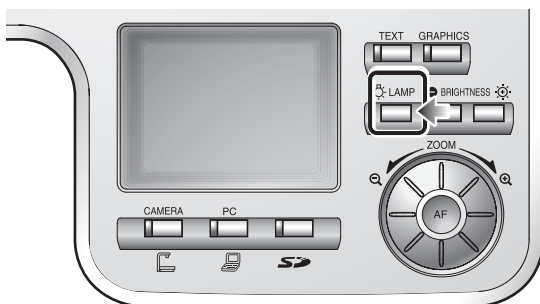

TELE (Telescopic): 500mm – ∞ from the zoom lens

WIDE (Wide-angle): 100mm – ∞ from the zoom lens

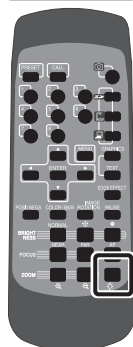

5 VARIOUS FUNCTIONS AND OPERATIONS

Lighting

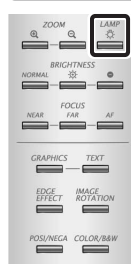

Front operating panel

Wireless remote control

WEB remote control

This camera is equipped with material illumination for presenting materials, such as printed matter, and base illumination for transparent materials, such as slide films and negative films.

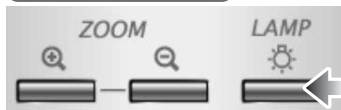

When the [**LAMP**] button on the front operating panel or wireless remote control is pressed, the fluorescent lamp lights up in 1 – 3 seconds.

- Each time the [**LAMP**] button is pressed, the material illumination lights up → the base illumination lights up → both illuminations go out in this order.

Wireless remote control

WEB remote control

Both the material illumination and the base illumination cannot be extinguished together.

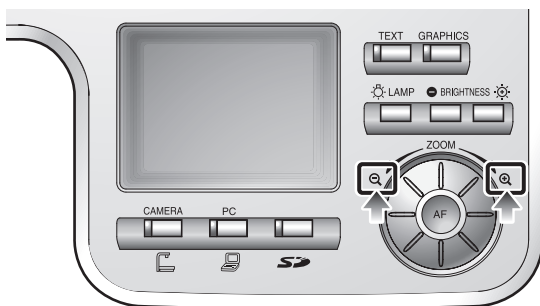

The illumination lamp helps obtain sharp display with good color rendering when it is used for a material surface with low brightness or for a three-dimensional object.

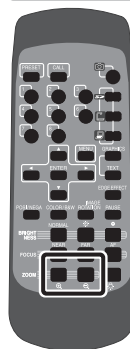

Do not look into the lamp unit of the material illumination. Also, do not touch the lamp unit of the material illumination when it is lighting, since it could be very hot.

Zoom

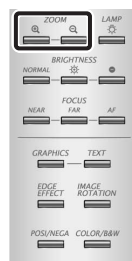

Front operating panel

Wireless remote control

WEB remote control

When the zoom dial [ , ] on the front operating panel is turned or the zoom button [ , ] on the wireless remote control is pressed, the document display range can be adjusted.

According to the zoom dial turning angle, the zooming speed varies in 3 steps (3-step speed change).

● Zoom magnification in the Camera mode

When the optical zoom is maximized (about 16×), the digital zoom is activated and the image can be zoomed in further up to 4× (about 64× combined with the optical zoom).

Within the digital zoom range, the image quality is degraded.

Within the digital zoom range, the zoom speed is locked.

When the digital zoom is use, the LCD monitor can be scrolled by using the direction button [   ] on the wireless remote control.

During the video image transfer through the USB connection or during the image transfer through the Ethernet connection, the digital zoom slows down.

When the zoom button on the WEB remote control is clicked once, the zoom operates at regular intervals.

When the image is in transmission through the USB cable, the digital zoom speed get slow.

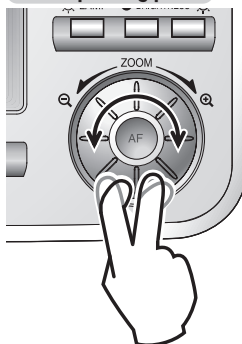

The digital zoom does not operate through the zoom via the WEB remote control.

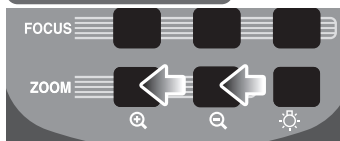

If the zoom via the WEB remote control is tried when the digital zoom is in operation, the digital zoom will be cancelled and the maximum zoom-in position of the optical zoom will be resumed.

Front operating panel

Wireless remote control

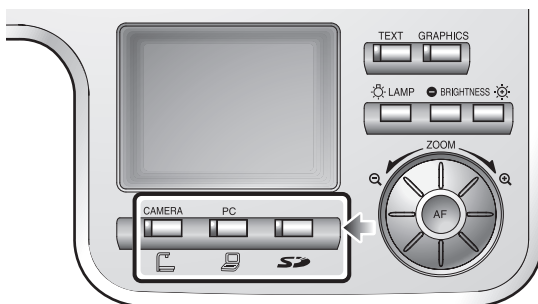

WEB remote control

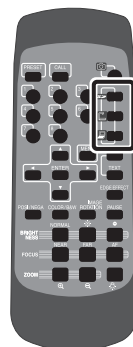

Image Selection

Front operating panel

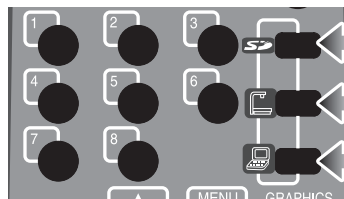

Wireless remote control

Each time the [CAMERA], [PC] button and [SD] button on the front operating panel or wireless remote control are pressed, the image is switched among the camera image, the image inputted in the analog RGB input terminal [RGB IN] and the image stored in the SD card.

When the PC or other unit is connected to the analog RGB input terminal [RGB IN], the output image can be switched without spending time and labor exchanging the connection cables.

Wireless remote control

 The image from the DVI output terminal [DVI OUT] cannot be switched to [RGB IN] image. **P.75**

 The display mode of the image from the video output terminal [VIDEO OUT] cannot be switched when [Video Out] is set to [Camera & SD] on the OSD.

 If the image mode switching is tried to the SD mode when an SD card is not in this product, the screen will turn black.

 By setting [Guide] to [On] on the OSD, the setting contents are displayed on the screen.

 To use a notebook-sized PC provided with the external output mode selective function, press the [PC] button on the front operation panel or wireless remote control, and then set the notebook-sized PC side to the external output mode.

 If the [PAUSE] button on the wireless remote control is pressed in the SD mode, neither the video image nor the still image can be displayed on the WEB screen.

■ Input image signal that can be output from the video output terminal [VIDEO OUT] into the analog RGB input terminal [RGB IN]

| Signal Mode name | Frequency | | | Resolution (Number of lines) | | Polarity of synchronized signal (P: Positive, N: Negative) |
|---------------------|-------------------|----------------|--------------------|---------------------------------|----------|---------------------------------------------------------------|
| | Horizontal kHz | Vertical Hz | Pixel clock MHz | Horizontal | Vertical | |
| VGA1 | 37.861 | 84.889 | 31.500 | 640 | 350 | P / N |
| VGA2 | 37.861 | 85.080 | 31.500 | 640 | 400 | N / P |
| VGA3 | 37.927 | 85.039 | 35.500 | 720 | 400 | N / P |

| UXGA@65Hz | 81.250 | 65.000 | 175.500 | 1600 | 1200 | P / P |
| UXGA@70Hz | 87.500 | 70.000 | 189.000 | 1600 | 1200 | P / P |
| UXGA@75Hz | 93.750 | 75.000 | 202.500 | 1600 | 1200 | P / P |
| UXGA@85Hz | 106.250 | 85.000 | 229.500 | 1600 | 1200 | P / P |
| Mac 13 | 35.000 | 66.667 | 30.240 | 640 | 480 | N / N |
| Mac 16 | 49.725 | 74.550 | 57.283 | 832 | 624 | N / N |
| Mac 19 | 60.241 | 74.927 | 80.000 | 1024 | 768 | N / N |
| Mac 21 | 68.681 | 75.062 | 100.000 | 1152 | 870 | N / N |
| PC98 | 24.825 | 56.420 | 21.052 | 640 | 400 | N / N |

This product may not accommodate any signal other than those listed in the above table.

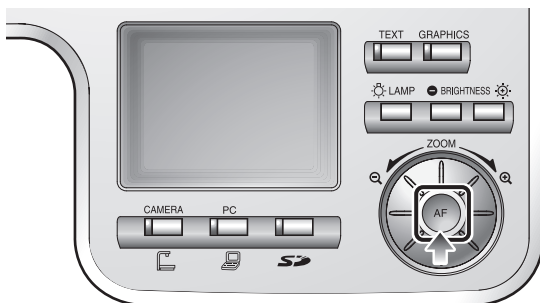

Depending on the input signal, the image may not be outputted in full size.

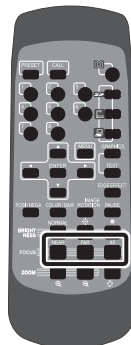

This product does not accommodate such synchronized signal as composite and SyncOnGreen.

Focus

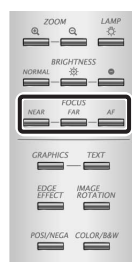

Front operating panel

Wireless remote control

WEB remote control

The focus on the object is adjusted.

■ Auto Focus

When the **[AF]** button on the front operating panel or wireless remote control is pressed, the camera is focused automatically. This product is of one-shot auto focus type. That is, once the camera is focused, the auto focus operation is released, and then focus position is maintained.

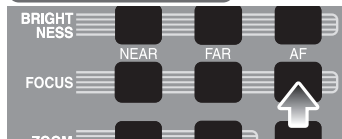

The objects listed below may not be brought into focus in the auto focus. In such case, use the manual focus mode.

- Objects having little contrast
- Objects with fine repeated patterns, such as lateral stripes and cross stripes
- Objects glittering or reflecting strong light
- Objects with bright background or excessive contrast
- Objects that are entirely dark
- Objects located near and far away at the same time
- Objects in motion

If the manual focus button **[FOCUS • NEAR]** or **[FOCUS • FAR]** on the wireless remote control is pressed when the auto focus is in operation, the auto focus operation will be cancelled.

Wireless remote control

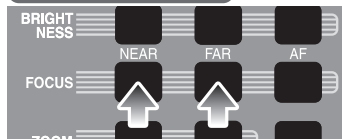

WEB remote control

VARIOUS
FUNCTIONS
AND OPERATIONS

Wireless remote control

WEB remote control

Limit of focus adjustment:

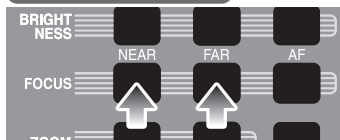

- With close-up lens
 TELE (Telescopic) : 250 – 410mm (9.8 – 16.1 in) from close-up lens
 WIDE (Wide-angle) : 85 – 410 mm (3.3 – 16.1 in) from close-up lens
- Without close-up lens
 TELE (Telescopic) : 500mm – ∞ (19.7 in – ∞) from zoom lens
 WIDE (Wide-angle) : 100mm – ∞ (3.9 in – ∞) from zoom lens

Manual Focus

When the focus button [**FOCUS • NEAR**] or [**FOCUS • FAR**] on the wireless remote control is pressed, the height on which the camera is focused changes.

This function is used for focusing the camera on any portion of a 3D object or the like.

Wireless remote control

WEB remote control

Limit of focus adjustment:

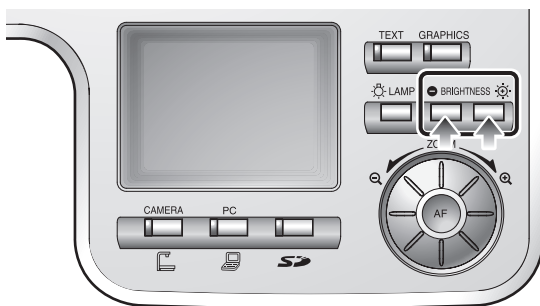

- With close-up lens
 TELE (Telescopic) : 250 – 410mm (9.8 – 16.1 in) from close-up lens
 WIDE (Wide-angle) : 85 – 410 mm (3.3 – 16.1 in) from close-up lens
- Without close-up lens
 TELE (Telescopic) : 500mm – ∞ (19.7 in – ∞) from zoom lens
 WIDE (Wide-angle) : 100mm – ∞ (3.9 in – ∞) from zoom lens

Even if the focus button on the WEB remote control is held down for a long time, the intended operation will not continue accordingly. To adjust the focus continuously, repeat clicking the focus button.

Brightness Adjustment

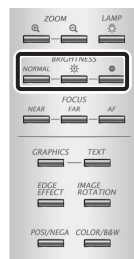

Front operating panel

Wireless remote control

WEB remote control

When either of the brightness adjustment buttons [] on the front operation panel or either of the brightness adjustment buttons [**NORMAL** • •] on the wireless remote control or WEB remote control is pressed or clicked, the image brightness is adjusted through the adjustment of the lens iris. This adjustment is performed in 2 adjustment modes as described below. Each mode is set by selecting [BRIGHTNESS] on the OSD.

■ Auto Brightness Adjustment

([Brightness] is set to [Auto] on the OSD.)

It is so set that the brightness to be tracked automatically can be adjusted.

When the brightness adjustment buttons [] and [] on the front operation panel are pressed together or the [**NORMAL**] button on the wireless remote control or WEB remote control is pressed or clicked, the current settings are reset to the default settings.

■ Manual Brightness Adjustment

([Brightness] is set to [Manual] on the OSD.)

It is set so that the brightness can be locked to any level.

The default setting is [Auto] (Auto Brightness Adjustment).

In the Manual Brightness Adjustment, the brightness is locked and the change in the object brightness is not tracked.

When adjusting the brightness manually, even if the brightness buttons [•] and [**NORMAL**] on the front operation panel are pressed together or the [**NORMAL**] button on the wireless remote control or WEB remote control is pressed or clicked, nothing will work.

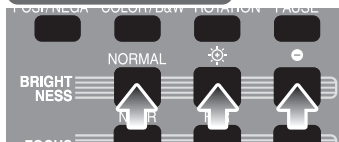

When [Guide] is set to [On] on the OSD, the setting contents are displayed on the screen.

When any button on the WEB remote control is clicked once, operation continues at regular intervals.

Wireless remote control

WEB remote control

State Presetting

The setting position of this product can be saved/called. Up to 8 positions can be saved. The presets that can be saved are as follows:

- Current zoom field angle (Optical zoom range)
- Brightness status
- White Balance state
- R-Gain (When the white balance is set to Manual)
- B-Gain (When the white balance is set to Manual)
- Edge Effect settings (When Graphics mode is selected)
- Gamma value settings (When Graphics mode is selected)
- Lighting ON/OFF
- Color/B&W selection settings
- Image Rotation state
- Mode settings
- Posi/Nega settings
- Microphone volume

The saved state can be retained even if the power supply is turned OFF.

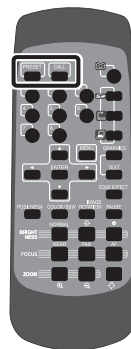

Rotated position cannot be saved to "Power On" setting. (Memory No. 8 on remote control)

The zoom angle of the digital zoom is not saved. When the digital zoom status is saved, the zoom angle to be saved is to the full extent of the telescopic [] side of the optical zoom range.

Wireless remote control

■ Presetting

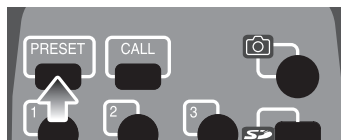

When the **[PRESET]** button on the wireless remote control is pressed and then "within 4 seconds", the memory number button on the wireless remote control is pressed, the present camera using status is memorized in the selected memory number.

When the **[PRESET]** button on the wireless remote control is pressed and then the memory number **[8]** button on the wireless remote control is pressed, the contents of this setting are called when the power is turned on the next time.

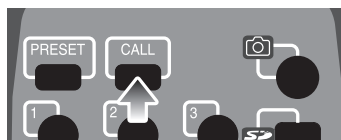

■ Calling

When the **[CALL]** button on the wireless remote control is pressed and then "within 4 seconds", the memory number button on the wireless remote control is pressed, the settings of the selected memory number are called. When [Call] → [Default] on the OSD are selected, the factory-set settings are called.

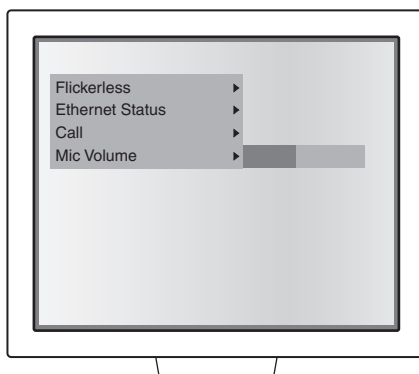

Wireless remote control

Wireless remote control

Microphone Input

Adjusting the microphone volume

When [▶] of **[Mic Volume]** is pressed on the OSD, the volume level bar is displayed. Then, adjust the volume by using the direction buttons [▲ ▼] on the wireless remote control.

When the volume is brought to the left end of the level bar, the microphone falls into the mute status.

White Balance

■ How to use [Auto]

To be used for adjusting the white coloring automatically according to the status of the document.

Default setting as of the shipment from our factory is [Auto].

■ How to use [One-Push]

To be used in case of the disruption of the image color balance due to the document status.

■ How to use [Manual]

When [White Balance] is set to [Manual] on the OSD, the white balance is fixed, and furthermore, [R-Gain] and [B-Gain] can be adjusted on the OSD.

The color temperature range that can be followed automatically is around 3000K — 8000K.

When [Guide] is set to [On] on the OSD, the setting details are displayed on the screen.

If the precise automatic adjustment is impossible due to the object or light source, adjust the white coloring automatically by imaging a white object, and set [White Balance] to [One-Push] on the OSD.

6 RS-232C SPECIFICATIONS

This product can be controlled from a PC connected to this product through the RS-232C terminal [RS-232C].

Setting Up

- ① Connect this product to a PC with an RS-232C cable.

When using an RS-232C cable available on the market, make sure that pin connections are the same as below.

To protect this product and the PC, be sure to turn OFF the power supply to all units before starting the connection work.

- ② Start the PC, and set the communication mode of the RS-232C to the communication mode of this product.

For the information how to set the communication mode of the RS-232C, refer to the instruction manual of the PC.

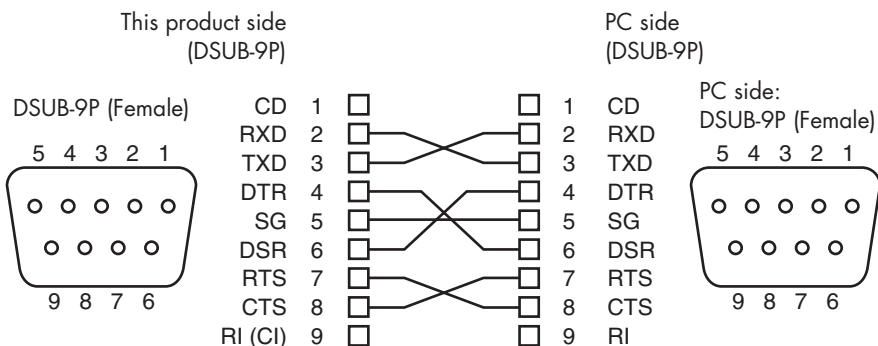

- ③ Start the PC program to operate this product.

- ④ Control through the RS-232C will start.

For communication control, be sure to take the above steps for settings.

Cable Connection

Data Format Specification

This command is executed in the form of 1-command/1-packet. The next command is not accepted until the previous processing is completed.

- The communication command always starts with STX (Start of Text), and ends with ETX (End of Text).
- If the communication format of command name is wrong, NAK (Negative Acknowledge) will be sent from this product as a result of failing to receive correctly.
- When communication format is received correctly, this product sends ACK (Normal Acknowledge).

■ Operation Command (PC → This product)

Each operation command is executed in ASCII code, and transmitted in a set of 7 bytes as follows:

| | | | | | |
|------|-------------|---------|-----------|------|-------------|
| (PC) | S T X | Command | Parameter | Data | E T X |
|------|-------------|---------|-----------|------|-------------|

(This product) → ACK

■ Response Data Format (This product → PC)

All response data is transmitted as ASCII code, corresponding to the parameters in the operation command table.

- Status 0

| | | | | | | | | | |
|-------------|----------|----------------|---------------|---------------|--------------|---------|-------|-------------|-------------|
| S T X | Lighting | Status display | Posi/ Nega | Color/ B&W | Display mode | Display | Pause | Flickerless | E T X |

For "■■" in the data column, transmit the SPACE [20H] twice.

Connection

If the RS-232C cable is not connected correctly between this product and the PC, no acknowledgement is transmitted.

Connect the RS-232C cable correctly, and fix it firmly with the connector set screws before starting the operation.

7 TROUBLESHOOTING

Symptoms and Confirmation

Check the following items. If any abnormality is found, consult the seller from whom you have purchased this product or our branch/office near your location.

| Symptom | Check this item |
|------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| No image is displayed on the TV monitor. | <ul style="list-style-type: none"> The cable is not connected correctly to the video-in terminal of the monitor. The power cord is disconnected from the wall AC outlet. The DC cord plug of the AC adapter is off the power socket of this camera system. The power switch is not ON. Zoom is set at the TELE side, displaying only the white/black part of the document. The power switch is turned ON immediately after it is turned OFF. In this case, this product may not start immediately. Wait for several seconds after turning OFF the power switch, and then turn it ON. |
| The image is out of focus. | <ul style="list-style-type: none"> The document (object) is too close to the lens. Zoom is at the TELE side after focusing at a wide angle (at the WIDE side). Focus on the point of max. at the TELE side. In the auto focus, focusing is difficult in some cases. |
| The lamp does not light up quickly. | <ul style="list-style-type: none"> For the protection purpose, the lamp is arranged to light up after preheating for 2 seconds. This is not a fault. |
| The video output image is disarrayed. | <ul style="list-style-type: none"> The video output is set to the PAL system. If this product, set to the PAL system, is connected to the monitor specially designed for the NTSC system, the video image may not be outputted normally but be disarrayed or in black and white. In such case, switch the system of the video output by referring to "DIP Switch" at P. 75. |
| The image is too dark. | <ul style="list-style-type: none"> The intensity of the lighting is not sufficient. Press the  button on the front operating panel or wireless remote control to turn ON the lamp. The brightness has been adjusted to the close side. Adjust the brightness so that the image can become bright. |
| The image is striped. | <ul style="list-style-type: none"> This may be interference fringes between dots of printed matter and TV scanning lines or CMOS pixels. This may be mitigated by changing the projection range. When using an LCD projector, vertical stripes may appear on the screen. This may be mitigated by manually adjusting the dot clock frequency on the projector side. |
| The brightness tone is out of order. | <ul style="list-style-type: none"> This may be mitigated by switching gamma settings. |
| The material (object) does not come to the center of the display | <ul style="list-style-type: none"> Initialize the camera position by referring to P. 90. |
| The microphone volume is not output. | <ul style="list-style-type: none"> Only the microphone for PCs (electret condenser microphone) can be connected to [MIC IN]. Before connection, carefully check the specifications of the microphone. |
| The network function does not operate. | <ul style="list-style-type: none"> Reconfirm this camera system and the network configuration of the PC to be connected to this camera system, and then, cross-check them with the phenomena described below. Reconfirm the restrictive conditions (e.g., number of connections) and the setting details of this camera system, as well. |

| Symptom | Check this item |
|-----------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| The network operation is unstable. | <ul style="list-style-type: none"> The WEB connection works only in the following environment: <ol style="list-style-type: none"> The OS installed is Microsoft Windows2000/XP/Vista. JRE1.5.0_12 or newer has been installed and Java (Sun) is valid. Internet Explorer6 or 7 has been installed. |
| The LAN cable cannot be connected. | <ul style="list-style-type: none"> The LAN connector (RJ45) is located on the main unit side. |
| The LAN connector link lamp (orange LED) cannot light up. | <ul style="list-style-type: none"> Power is not supplied to this camera system or the unit to be connected to this camera system. Check whether the cable is connected firmly, and then turn ON the power supply. |
| | <ul style="list-style-type: none"> The cable is disconnected. Check the conduction between the cable terminals. |
| | <ul style="list-style-type: none"> The cable used is wrong. Basically, when the unit to be connected to this camera system is a PC, "cross cable" or "LAN cross cable (attached to this camera system)" is used, and when it is a hub or router, "straight cable" is used. Actually, the specifications of the unit should be checked. |
| Connection from the client is impossible. | <ul style="list-style-type: none"> The IP address of this camera system has not been designated. Designate the IP address set in this camera system. |
| | <ul style="list-style-type: none"> The IP address of the client is not compatible with the network of this camera system. To establish the connection from the client to this camera system, the network address (192.168.1.* when this camera system settings are default) should be the same between the client and this camera system. * If the IP address of this camera system has escaped your memory, refer to "IP Address" (P. 77) or "Ethernet" (P. 78) of the OSD. |
| | <ul style="list-style-type: none"> The router settings are wrong. Check the network configuration of this camera system and the client, and set the router accordingly. |
| The network configuration page cannot be accessed. | <ul style="list-style-type: none"> The authority "user" was used for login. Use the authority "root" for login. |
| The FTP client configuration page cannot be accessed. | <ul style="list-style-type: none"> Use the authority "root" or "user" for login. |
| Image capture through the network is impossible. | <ul style="list-style-type: none"> [USB Mode/Ethernet] has not been set to [Ethernet] on the OSD. |
| | <ul style="list-style-type: none"> The mode is not the camera mode. The camera image cannot be captured in the SD mode. |
| | <ul style="list-style-type: none"> [PAUSE] is working in the camera mode. |
| Image capture through Image Mate is impossible. | <ul style="list-style-type: none"> [USB Mode/Ethernet] has not been set to [Application] on the OSD. |
| Image capture through the FTP client is impossible. | <ul style="list-style-type: none"> [Capture] has not been set to [Ethernet] on the OSD. |
| Image cannot be saved on the SD card. | <ul style="list-style-type: none"> [Capture] has not been set to [SD] on the OSD. |

Replacement of Lighting Lamp (Fluorescent Lamp)

The lighting lamps (fluorescent lamps) are expendables. When any of them begins to shimmer or dim, replace it.

For the replacement of the lamp, consult the dealer from whom you have purchased this product or our branch/office near your location.

About the long-time use

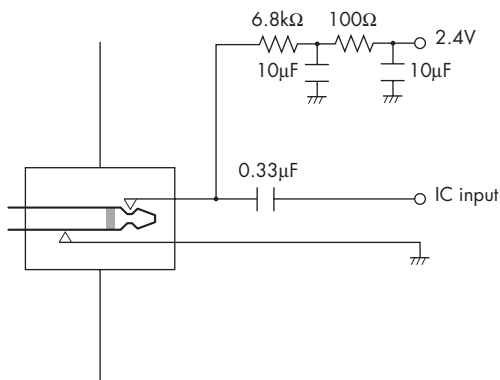

When this camera system is used for a long time exceeding the warranty period or it is used for a long time with the power always ON, the performance or quality of this camera system could be degraded due to the expiry of the service life of some parts. In this case, the exhausted parts can be replaced with payment. For this replacement, contact the sales outlet from which you have purchased this camera system or the nearest branch office or sales office of ours.

8 SPECIFICATIONS

■ General

| Item | Specifications | | |
|-----------------------|-------------------------------------------------|----------------------------------------------------------------|----|
| Power source | 12VDC (AC adapter: 100 ~ 240VAC) | | |
| Power consumption | 35W (AC adapter included) | | |
| Outside dimensions | 457×562×138mm (18.0×22.1×5.4 in) (When folded) | | |
| | 457×519×587mm (18.0×20.4×23.1 in) (When set up) | | |
| Weight | Approx. 8.5kg (18.7 lbs) (Main body only) | | |
| Input selection | Main body / External one system | | |
| Output terminal | DVI output | DVI-D 24P connector, female | ×1 |
| | RGB output | Mini DSUB 15P connector, female | ×1 |
| | Composite video output | RCA pin jack / 75Ω unbalanced (NTSC/PAL) | ×1 |
| | Audio output (stereo) | RCA pin jack / compatible impedance 1kΩ or more 300mV (rms) | ×1 |
| Input terminal | RGB input | Mini DSUB 15P connector, female | ×1 |
| | Audio input (stereo) | 300mV (rms) impedance 20 kΩ or more φ3.5mm stereo mini jack | ×1 |
| | Microphone input (mono) | φ3.5mm jack / compatible impedance 6.9kΩ 30mV (rms) | ×1 |
| Ext. control terminal | RS-232C | Dsub 9P connector, male | ×1 |
| | USB (2.0 compliant) | Type B receptacle | ×1 |
| | Ethernet | 8-core modular type (RJ-45) | ×1 |
| Memory interface | SD card slot | | ×1 |

| Resolution | Analog RGB output: Horizontal 800TV lines or more Vertical 800TV lines or more Video output: Horizontal 450TV lines or more | |
| DVI output | TMDS data signal 0.5 (Vp-p) 50Ω (Terminated) | SXGA: Horizontal frequency 63.98kHz; Vertical frequency 60.02Hz (1280×1024 at 60Hz); Compliant with VESA HDTV: Horizontal frequency 44.7kHz; Vertical frequency 60Hz (1280×720 at 60Hz); Compliant with HDTV XGA: Horizontal frequency 48.363kHz; Vertical frequency 60.004Hz (1024×768at 60Hz); Compliant with VESA |
| Analog RGB output | 0.7 (Vp-p) 75Ω unbalanced, Synchronized signal: SXGA Positive polarity HDTV Negative polarity XGA Negative polarity | |
| Composite video output | Compliant with NTSC/PAL | |
| White balance | Full auto / One-push / Manual | |
| Video output selection | Provided (NTSC/PAL) | |
| Posi/Nega conversion | Provided | |
| Color/B&W selection | Provided | |
| Image rotation | Provided (0°/180°, Automatic rotation by 180° for forward shooting) | |
| Text mode | Text1 / Text2 / Text3 / GRAPHICS | |
| Gamma setting | Provided (GRAPHICS mode only) | |
| Edge enhancement | Provided (GRAPHICS mode only) | |
| Pause | Provided | |
| Image recording | Provided (SD card) | |
| Split display | Provided (SD card image / 9-splits / 16-splits) | |
| Slide show | Provided (SD card image) | |

■ Network

| Item | Specifications |
|-------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|
| Interface | 10BASE-T/100BASE-TX (RJ-45) |
| Compliant protocol | IP, ARP, ICMP, TCP, HTTP, FTP, telnet |
| Recommended browser | Internet Explorer6.0 or newer |
| Compliant OS | Windows2000 (SP4 or newer)/XP (SP2 or newer)/Vista |
| Connection port No. | HTTP:80, FTP:20,21, telnet:23 |
| Compliant language | Japanese, English |
| Image format | Motion-JPEG |
| Image size | SXGA: Horizontal 1280, Vertical 1024 HDTV: Horizontal 1280, Vertical 720 XGA: Horizontal 1280, Vertical 960 |
| Frame rate | Max. approx. 5fps |
| Number of clients simultaneously connectable to live screen | 5 clients |
| Number of clients simultaneously connectable to FTP server | 1 clients |
| Still image display | JPEG |
| Main unit remote function | ZOOM, LAMP, BRIGHTNESS, FOCUS, GRAPHICS, TEXT, EDGE EFFECT, IMAGE ROTATION, POSI/NEGA, COLOR/B&W |

This camera system can be remote-controlled or the status of this camera system can be captured by using the telnet. For the information of its command, etc., contact the sales outlet from which you have purchased this camera system or the nearest branch office or sales office of ours.

■ Lighting

| Item | Specifications |
|-------------------|-------------------------------------------------------------------------------|
| Lighting | High frequency lighting mode, twin fluorescent lamp, Type 9 (Model: FPL9EX-N) |
| Base illumination | Cold-cathode tube |

■ Supplied Accessories

| Name | Quantity |
|--------------------------------------------|----------|
| Power adapter | 1 |
| Power cord (1.5m) | 1 |
| Video cable (RCA pin connector) (3m) | 1 |
| Analog RGB cable (DSUB 15P connector) (2m) | 1 |
| DVI cable (2m) | 1 |
| Infrared wireless remote control | 1 |
| Batteries (Type R03, AAA) | 2 |
| Instruction Manual for P100N | 1 |
| Warranty Card for P100N | 1 |
| USB cable (1.8m) | 1 |
| Utility Software Installation Manual | 1 |
| Utility Software CD-ROM | 1 |
| Ethernet cross cable (1m) | 1 |

For the RCA pin, use a pin plug compliant with EIAJ RC-6703.

The above specifications are subject to change without notice.
